PROFILE SUMMERY

I am a skilled Full Stack Developer with expertise in both front-end and back-end technologies. I have hands-on experience with HTML, CSS, JavaScript, and modern frameworks like Bootstrap, along with a strong foundation in back-end technologies such as Python, C++, and SQL. My focus is on developing responsive, scalable, and user-centric web applications, ensuring a seamless user experience across platforms. With a B.Voc in Information Technology, I possess a solid understanding of core computer science principles and am continuously learning and adapting to the latest industry trends and technologies. I am passionate about building high-quality, efficient solutions and collaborating in fast-paced, agile environments to deliver innovative web applications.

Projects

Portfolio

- Designed a responsive landing page using HTML5 and CSS3 to ensure a clean and modern layout.
- Enhanced user engagement by including interactive elements like buttons, hover effects, and smooth scrolling animations using CSS transitions.
- Ensured cross-browser compatibility, conducting thorough testing across major browsers (Chrome, Firefox, Safari, Edge).

Crud Application

- Developed a CRUD (Create, Read, Update, Delete) application using PHP and MySQL to demonstrate server-side scripting and database integration.
- Implemented basic CRUD operations for managing data, such as adding, viewing, editing, and deleting records from a MySQL database.

Amazon Clone Web Application

- Developed a fully functional Amazon clone using HTML5, CSS3, and JavaScript for the front-end to replicate the core features of the Amazon shopping platform.
- Implemented a dynamic shopping cart and product listing pages, allowing users to interact with the app as they would on the original Amazon site
- Conducted thorough cross-browser testing (Chrome, Firefox, Safari, Edge) to ensure consistent design and functionality across all major browsers.
